

eXact Basic Spectro

Basic Spectrophotometer

Best-in-Class L*a*b* and Density Measurement

The eXact Basic Spectro is a member of the X-Rite eXact family of handheld color measurement instruments. It is designed for press operators to compare L*a*b* and production density measurements against stored standards with pass/fail indication. With the eXact Basic Spectro, you can streamline your workflow since it provides a single platform for all your formulation, storage, approval, retrieval, and quality control requirements, whether you're dealing with offset, flexo, gravure, or screen-printing inks.

Increased Job Productivity

- Automatically detects color and patch type, decreasing measurement times and improving accuracy
- Offers the ability to upgrade to Bluetooth connectivity for a seamless transfer of data

An Extensive Tool for Color Control

- Verifies basic colorimetric functions and all aspects of density including ink trap, print contrast, and hue error for better control of the print process
- Provides the ability to measure offset printing plates, allowing you to measure a print curve and to view density trends

Manage Business Growth

- Enables user to configure the device and control all elements on a selected job
- Enhances security, protects your instrument and tool configuration with password protection
- Offers the choice of four different aperture sizes (1.5, 2, 4, or 6 mm), providing operations the ability to measure across a range of applications

eXact Basic Spectro Basic Spectrophotometer

Additional Features:

Xp Offering

All eXact models are available in Xp mode, meaning they are specifically designed to help packaging printers and converters more accurately measure color on flexible film materials and other print and packaging substrates without the need for polarized measurements (M3).
